EDUCATION

Bachelor of Science (B-Sci) Jul, 2023 - Jun, 2026
The University of Melbourne
- Major in Computing and Software Systems
- Core Subjects: AI, Object Oriented Programming, Software Modelling and Design, Database Systems
- Current Average WAM: 76

EXPERIENCE

Kitchen Staff Nov, 2026 - Present
Jojo Little Kitchen, Melbourne, Victoria
- Prepared food and assisted with kitchen operations while maintaining food safety, hygiene and quality standards
- Coordinated with kitchen team members to ensure timely order preparation and smooth service during busy periods
- Managed multiple tasks in a fast-paced environment while maintaining accuracy and attention to detail
- Adapted to changing priorities and interacted with team members to support daily operations

TECHNICAL SKILLS

- Programming Languages: C# | C | Java | Python | SQL | GDScript | JavaScript
- Tools: Git | GitHub | Cloudflare | Confluence | Jira | Figma | Playwright
- Framework & Technologies: Node.js | Express.js | Next.js | MongoDB | EasyOCR | React
- Development Practices: Agile | Scrum | REST APIs
- Spoken Languages: English (Native) | Cantonese (Native) | Malay (Native) | Mandarin (Intermediate)

RELEVANT PROJECT WORK

Careless Tools DVI Oct, 2026 - Present
Personal Project
- Designed and developed a companion web application used by a community of 30 players, providing XP calculations, collection planning and equipment enhancement simulations
- Reverse-engineered undocumented game data structures to retrieve player statistics, developing workarounds for information not exposed on game's interface
- Constructed a companion user script enabling one click character data imports, using browser events to communicate with the React application without requiring a backend
- Developed a custom Vite plugin to generate multiple user script variants from a shared template, and integrated standalone functionality into main application using modular architecture

Recall Guard Aug, 2025 - Nov, 2025
Medical Pantry, Melbourne, Victoria
- Developed REST API endpoints using Node.js and Express.js to handle API requests and data flow
- Collaborated in a 5-person team to design and build an app identifying recalled medical products, reducing manual verification time by integrating EasyOCR with openFDA for real-time authentication
- Managed sprints and technical documentation using Jira and Confluence, keeping the team aligned across multiple 4-week sprint cycles

UniMelb GMC Game Jam Apr, 2025 - Apr, 2025
Top 8 in Overall, Melbourne, Victoria
- Co-developed a 2D roguelike game with inventory and spell systems in Godot as a 2-person team, placing Top 5 in gameplay category
- Applied the Creator principle in GRASP for enemy spawning, improving readability and scalability
- Designed game objects using polymorphic principles, enabling faster iteration and easier extension of gameplay systems
